Why Heuga?

- Standard guarantee of 7 years
- Easy to maintain
- Good sound and insulating properties
- Slip resistant
- Reduce dust particles which guarantees a better indoor air quality
- Flexible
- Modular
- Sustainable

choose practicality, endurance and quality

Since 1956, Heuga has sold modular, sustainable carpet tiles that are suitable for every room in the house. From the living room to the home office and from the kitchen to the hallway, to use as wall-to-wall floor covering or to use as a rug. With Heuga carpet tiles you combine quality with a wide range of colours, textures and patterns. The possibilities are endless.

Your style

Heuga is what you want and what fits you best. You don't have to be satisfied with wall-to-wall floor covering that limits you to one specific style! With carpet tiles by Heuga, you design your own unique carpet or rug that matches your interior, your taste and your environment. Be creative with your favourite colours and use our handy online floor planner (see page 32) or rug designer (see page 34) to make a truly unique design.

New

Heuga introduces two new products in this catalogue:

- smart **sense** (page 24): a structured loop pile with a luxurious appearance
- twisted **texture** (page 30): a shaggy for a contemporary look

In this catalogue you find inspiring designs, a convenient colour overview (see page 6) and practical information (see page 38).

puzzle **pieces/2** & lazy lounge/2
rich plum, forest fruits, rich aubergine

Acoustics

Heuga carpet tiles have a good sound absorbing capacity of at least 10 dB and score very high in terms of noise reduction. The acoustics properties of carpet tiles compared to hard floors is much better because sound reverberates in space, which makes the use of carpet tiles perfect for use in apartments and bedrooms .

Under floor cooling and heating

Heuga carpet tiles feel not only soft, but are also suitable to use with under floor cooling as well as under floor heating.

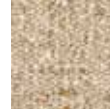

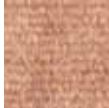

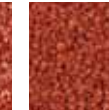

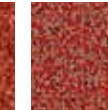

Heuga and your health

Asthma sufferers and those with breathing problems will be pleased to learn that Heuga actually improves indoor air quality as it absorbs common airborne pollutants such as dust and allergens which can then be easily vacuumed away. An independent study carried out by the German Asthma and Allergy Foundation found that the air over smooth floor coverings contains almost twice as much fine particulate dust than air in a carpeted room.

colour options

We have grouped all of our colours in a conveniently arranged manner so that you can find exactly the right colour that matches your interior at a glance.

However, nothing beats the material itself; you have to see and feel it. You can request samples of every product from a dealer near you. On heuga.com you can find addresses of the nearest sales outlets. This way you know for sure that you are making the right choice in colour and texture.

basic beauty

Practical, wear-resistant and durable are the characteristics of the basic **beauty** collection. This collection is perfectly suited for high-traffic areas such as the living room, bedroom, hallway or home office. Thanks to the extensive colour palette, there will always be a colour or colour combination that suites your interior.

color collection

This collection is an excellent choice for functional spaces such as the kitchen, bedroom or utility room. color **collection** is easy to clean, wear-resistant and has a very good price/quality ratio. You can choose from 12 diverse colours, which will make even the most functional spaces look nice.

10

color collection
graphite, marble, ocean

country classic/2

country **classic/2** is one of the two wool qualities in our collection and is made of 100% natural virgin wool. A very durable, sturdy but comfortable product, suitable for the living room, bedroom or hallway. And wool is also easy to clean, moisture-regulating and fire-retardant. The colour palette and texture of country **classic/2** can be perfectly combined with our country **contemporary** collection (page14).

country contemporary

This beautiful collection consists of 80% luxurious wool, giving it a wonderfully full, rich texture. Sink your feet into this material and experience the comfort of a wool carpet. The collection features 8 traditional, stylish colours that fit with every living room, bedroom or hallway where style and comfort are paramount. What's more, the colour palette of country **contemporary** is entirely coordinated with the country **classic/2** collection (page 12).

fresh flavour

fresh **flavour** is a stylish collection with a contemporary character and a unique loop pile structure. This gives this quality a full and soft texture, creating a luxurious appearance. The palette of 12 natural colours forms the ideal basis for a calm and neutral interior. fresh **flavour** is very suitable for use in the living room, bedroom, hallway or home office.

16

le bistro

Families are tough on a floor, especially in high-traffic areas such as the living room, kitchen, bedroom, utility room or hallway. le **bistro** is a very wear-resistant collection that is easy to clean because of the stain treatment on every tile. This ensures easy cleaning and hygiene. Ideal for areas where there could be spills once in a while.

18

le bistro
salsa, gingerbread, coconut milk, cappuccino

puzzle pièces/2

really random

The colour palette and the loop pile structure of really **random** are based on the biomimicry principle whereby nature works as a source of inspiration. The tiles can be placed in any desired direction, which ensures a seamless transition and a natural effect. A nice advantage is that laying the tile is so easy, and the cutting loss is limited to a maximum of 3%. Give your floor the additional character it needs and choose from among the 10 natural shades.

22

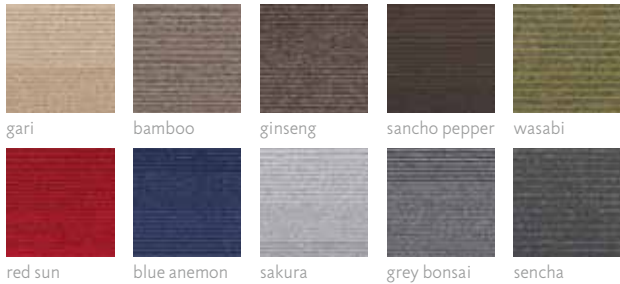

New!

smart sense

smart **sense** is inspired by Japanese culture, which is clearly reflected in the combination of the 10 warm, natural colours and contemporary lines. The carpet tile offers the comfort of a soft floor and the advantage of a hard floor. Its 60% recycled content makes the product very environmentally friendly, but without sacrificing quality. smart **sense** is ideal for your living room, hallway and home office. smart **sense** can be placed in any desired direction, which provides a lot of flexibility and minimizes cutting loss to 3%.

24

smart sense
bamboo

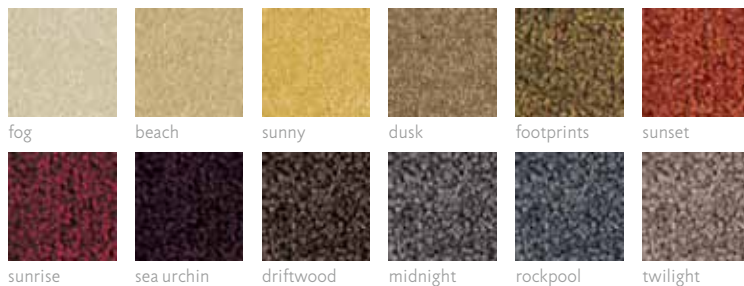

soft senses
sunrise, fog

soft senses

With soft **senses** in your bedroom, it's pure enjoyment when you get out of bed in the morning with bare feet! soft **senses** is made of wonderfully soft quality that is ideally suited for the bedroom and bathroom. Once it is installed, it has a wall-to-wall appearance but with a personal, unique design that you won't find anywhere else.

26

lazy lounge/2
waterlily, black velvet

lazy lounge/2

With lazy lounge/2 you combine a wonderfully soft, comfortable shag pile with a luxurious look. Ideal for the bedroom, home office or to use as a rug. For example, you can combine this high pile with a cut pile such as puzzle pieces/2 (page 20) for a very special effect.

Bed linen: varia slaapcomfort.nl · Accessories: kookpunt.nl

solid square

solid **square** is a traditional quality carpet that you've come to expect from Heuga and that is an integral part of our product assortment. This product proves that quality does not need to be expensive. solid **square** can be laid in any desired direction, offers all of the advantages of modular floor covering and is very wear-resistant. That's why this collection is perfectly suited for high-traffic areas such as the utility room, hallway or storage area.

28

lion gazelle elephant panther

walk way
sky

walk way

walk way was specially developed for intensive and heavy use and is therefore frequently used in the utility room or hallway. This is a non-woven product with a unique rib structure. It is incredibly durable and offers excellent value for your money. The nine colours can be nicely combined with each other, allowing you to create a checkerboard pattern, for example. Or simply use one colour for a calm look.

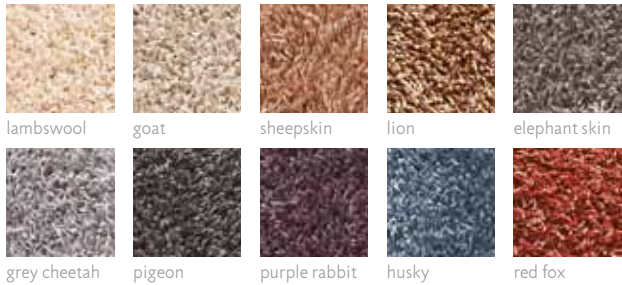

twisted **texture**

Do you want a floor that is unimaginably soft for your feet? twisted **texture** is the ideal choice. Thanks to its soft and luxurious look, twisted **texture** is excellently suited for the living room or bedroom. Thanks to the carefully chosen colour palette, you can make your interior stylish, contemporary and comfortable all at the same time. With this beautiful high pile product, you get quality flooring which can also be used as a rug on any hard floor.

30

twisted texture
goat, red fox

design your own unique Heuga flooring

32 Carpet tiles make it easy for you to design your own flooring that matches your interior, your style and your furnishings. Something that is impossible with wall-to-wall coverings. In this catalogue you will find a lot of design options, but of course it is also possible to create your own flooring design.

To make this easier, the Heuga website features an online floor planner. You can use this programme to try out various flooring options in various rooms. In some of the areas you can even adapt the colour of the wall. Use one product or combine two or more products and immediately see what this would look like.

The floor planner is also suitable for use on a tablet. Do you have your final design ready? Then take your table with you to the store or order the products you want directly online.

unique rugs

The online Heuga rug designer makes designing your own personal rug easy. Combine colours and give your rug texture by using high-pile and low-pile variants. You can even change the colours of the walls to one of the 155 standard shades. Select one of our rugs and create your own design with the rug designer. Just like the floor planner, the rug designer is suitable for use with tablets, but the rug designer offers more. You can also save your design, email it or directly post it to your Facebook profile!

Once your rug has been installed, you might want to make a few changes. That's easy with TacTiles™ (more information on page 36), with which you can reorder the tiles into a different combination and create a new look in no time. You can't do that with a one-piece regular rug!

For more information about rugs, maintenance and installation instructions, go to heuga.com.

laying your rug

In line with our goal of being as environmentally friendly as possible with our carpet tiles, we have developed a sustainable and highly effective glue-free installation system called TacTiles™. TacTiles™ are small, transparent, adhesive plastic squares that are placed underneath the corners of the carpet tiles in order to fix them firmly to each other. The adhesive side of TacTiles™ points upward and is affixed to the back of the tile, which means that TacTiles™ don't leave any marks on the floor.

Ideal for laying rugs

TacTiles™ are so strong that you can even lift up the entire rug. Because the tiles have a sturdy back, they remain firmly in place and don't shift. Feel like a change? If you want, you can always revise your design: Thanks to TacTiles™ you can easily exchange every single carpet tile.

a vision of durability

Heuga is the consumer brand of Interface, the world's largest manufacturer of modular carpets. As a company we are committed to a shared sustainability vision with 'Mission Zero' as our ultimate goal.

Mission Zero

Mission Zero is Interface's goal to eliminate all of the company's negative influence on the environment by 2020 at the latest. Below is an abbreviated overview of the things that we've achieved in this respect since the initiation of Mission Zero:

- All of the European plants use 100% green electricity.
- 31% of the energy that we use worldwide stems from renewable sources.
- 88% less waste brought to the dump.
- 84% less water usage in our production process.
- 47% decrease of our total energy consumption.
- Decreased use of non-renewable energy by 64%.
- Decreased total greenhouse gas emissions by 32%.
- 44% of the raw materials are recycled or biomaterials.

Go to heuga.com for more comprehensive information about Mission Zero and the environmental projects in which we are involved.

The story behind our vision

For the first 21 years of Interface's existence, we never gave serious thought to what we were taking from or doing to the Earth, except to be sure we complied with all laws and regulations. But in August 1994, Ray Anderson, founder of Interface, read the book "The Ecology of Commerce" by Paul Hawken. This not only changed Anderson's life but also made him understand that something had to change. Later that year, Interface committed to become the first name in industrial ecology worldwide, in substance, not just in words. At the moment, Interface is one of the most important brands in the area of sustainability in the world.

Mission Zero:
*our promise to eliminate
 any negative impact our company
 may have on the environment
 by the year 2020.*

practical information

On this page you will find everything you need to know about Heuga carpet tiles as well as an explanation of the symbols that are used in this catalogue.

Find the right floor for the right space

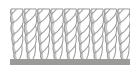

The symbols below are noted on every product page and indicate which products are suitable for which spaces.

Which type of carpet should I get?

In a loop pile carpet, the yarn is tufted in order to form loops. This creates a very wear-resistant carpet that is easy to clean and is suitable for intensive use. The texture and how the carpet feels depends on the yarn used and the loop density. Loop pile qualities are basic **beauty**, color **collection**, country **classic/2**, smart **sense**, fresh **flavour**, le **bistro**, really **random** and walk **way**.

A carpet with a cut pile is made by cutting through the loops, which makes the yarn tufts stand upright. This makes for a softer texture, although footprints are more clearly visible on the carpet. Products with cut pile are country **contemporary**, puzzle **pieces/2** and soft **senses**.

Shag carpet has much longer tuft, and much thicker yarn is used for this. This results in a deeper texture that both looks luxurious and feels nice. However, this type of carpet is less suited for intensive use or for areas that are subject to extreme wear and tear. twisted **texture** is a shaggy carpet.

A needlefelt carpet is produced using barbed and forked needles. Individual layers of fibres are laid on one another and felted using a series of needles which pierce these base layers through and through. Needlefelt carpets are solid **square** and walk **way**.

What direction should the tiles be laid in?

The back of the tiles have arrows to help you during installation. There are three different laying methods, each with a different effect, depending on the direction in which you lay the tiles. You can also create your own effect by combining different patterns and textures with each other. Note the symbols below in this brochure for installation advice per product.

quarter turn

non directional

monolithic

Each carpet has a different comfort class, with the highest comfort class having five crowns.

castor wheels

suitable for intensive use
of castor wheels

suitable for floor
heating

slip resistance

Sound absorption

Heuga carpet tiles have a good sound absorbing capacity of at least 10 dB and score very high in terms of noise reduction. The acoustics properties of carpet tiles compared to hard floors is much better because sound reverberates in space, which makes the use of carpet tiles perfect for use in apartments and bedrooms.

contract use

Easy installation

Installing Heuga carpet tiles is very easy. In spaces smaller than 30 m², the carpet tiles can be laid individually, without the use of tape or glue, as long as the tiles are laid tightly against each other from wall to wall. For larger surfaces or for rugs, you can use TacTiles™ (see page 36).

Under floor heating and floor cooling

All Heuga carpet tiles are compatible with floor cooling and underfloor heating as long as the maximum temperature of the floor doesn't exceed 28°C. Please consult your own documentation relating to your under floor cooling and heating system for further information.

Seven-year warranty

All Heuga products have a seven-year guarantee for colour-fastness and functionality, provided that they are installed, maintained and used in rooms and used in compliance with our warranty conditions. Go to heuga.com for our complete terms and conditions.

Where can I buy Heuga products?

You can purchase Heuga from a Heuga dealer near you. Our website lists addresses of the nearest sales outlets. The dealer can advise you as to which colours and textures to choose as well as how many tiles you will need. Experienced installers will bring your design to life.

How much do I need?

Using our online floor calculator at www.heuga.com you can calculate how many m² you will need. Of course, you can also ask your local dealer for advice or draw out the space yourself on squared paper. All of our tiles are 50 x 50 cm, which translates into four tiles per square metre. We suggest that you allow 10% extra when ordering to allow for difficult spots such as recesses and alcoves.

Maintain your Heuga flooring

Maintenance is just like for any other carpet: regular vacuuming removes daily dust and dirt, and a steam clean once or twice a year will do the rest. Heuga carpet tiles can be cleaned where they lie or under the tap. If you've removed a tile from the floor to clean it, first allow the tile to dry naturally before replacing it.
