

BROSSGUARD® PLUS

1

How to keep moisture and dirt outside

The Brossguard® Plus Professional or Brossguard® Plus Prestige fit every door opening, do not require a matwell and are the first barrier against sand, grit, mud and other dirt. This is how you increase the life of your floors and reduce the cost of their maintenance. Thanks to the use of solid aluminium profiles, this mat is eminently suited to heavy-traffic entrance areas, and can withstand forklift trucks, or heavy traffic in supermarkets, for example.

Tests have been conducted to European standards

The Verimpex entrance mats conform to the European standards regarding moisture and dirt evacuation. Also the properties for absorption and slip resistance have been taken into consideration. A comprehensive guarantee is given on the wear resistance of brushes, profiles and good colours fastness achieved to washing and light, under standard use conditions.

Guarantee

Verimpex produces entrance mats of high quality and also offers a complete after sales service. High quality requires a high quality service and that is the reason for offering a guarantee on wear resistance up to 10 years. For more conditions, please visit verimpex.be

Your expert in matting

Did you know that most of the wear-and-tear and damage to floors is caused by dirt and moisture?

The right entrance mat can reduce these problems significantly, which greatly simplifies the maintenance of your floors and considerably increases their life!

Verimpex range

Verimpex has developed, and manufactures, a wide range of maintenance-friendly, top-quality entrance mats. Thanks to the wide range of colours, patterns and finishes, every mat can be fully tailored to the customer's needs.

Verimpex introduces extremely effective entrance mats onto the market.

Following intensive research in collaboration with Ghent University, Verimpex has brought a new, efficient entrance mat with brush profile onto the market, the Brossguard® Plus. This mat uses our patented water-drain technology and ensures maximum moisture absorption and drainage. The sturdy and durable materials result in the mat's long life.

TOP GUARD

2

High-performance in heavy-traffic conditions

The Topguard® performs at its best in heavy-traffic conditions. After all, the mat can handle very heavy traffic and is available in open and closed construction. The robust Topguard® can be finished with single or double strips (30% more drying surface). This is why the mat is eminently suited to shops, offices, banks, hospitals, ... It is available in different colours, heights, compositions and shapes, and we can even integrate your logo in the design!

TIREGUARD high traffic

3

Ecological entrance mat with excellent durability

A mat consisting of high-grade fibres and rubber strips made from recycled aircraft tyres? Thanks to the aluminium profiles, this mat is extremely hard-wearing. The Tireguard® represents excellent value for money, makes for very good moisture absorption and can withstand thousands of shoe soles per day. A durable and environmentally-friendly alternative for your entrance!

POLY GUARD

4

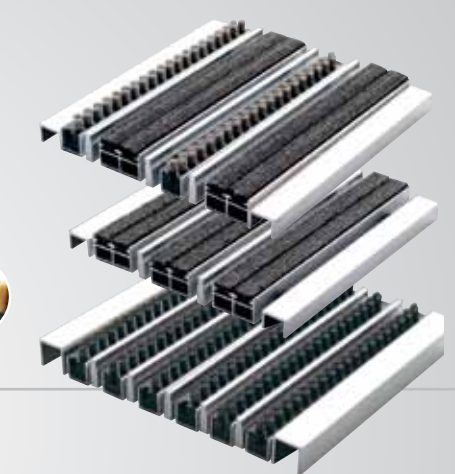

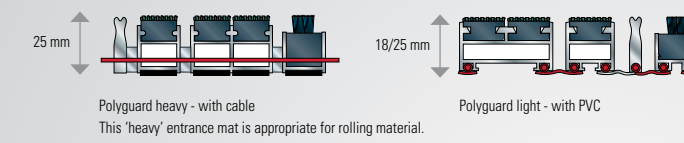

The all-round mat for drying, brushing and scraping

This mat is second to none when it comes to professional mats. The Polyguard® has the greatest drying capacity and, thanks to the steel connection cables, can handle heavy traffic. Owing to the best possible balance between scraping and drying, this mat can handle all types of dirt and can be used in any context. Like every Verimpex mat, the Polyguard® is available in different shapes, sizes and colours. This mat will stay in top condition for at least 10 years. Guaranteed!
